April 9, 2019

I am happy to share the Port Authority Aviation Department's 2018 Annual Traffic Report, which provides important statistics on air traffic at our regional aviation facilities, including comparative data on airports worldwide and the multitude of destinations our airports offer our customers.

2018 IN PERSPECTIVE

By any measure, 2018 was a spectacular year for the Port Authority's airport system. Passenger growth in 11 of the 12 months ushered an all-time annual record of 138.8 million passengers—a 4.5 percent gain over 2017.

In every year since 2010, growth across the four commercial airports that comprise our system—JFK International, Newark Liberty International, LaGuardia and New York Stewart International—has established a new regional record. The current streak far outpaces the previous run of consecutive record years (1995-2000) and features an average growth rate of 3.8 percent, compared to 2.8 percent from that 1990s streak.

Remarkably, passenger traffic grows ever faster even as our facilities have matured—a feat made possible by the resiliency and dynamism of the New York region and the Port Authority's airport system. More importantly, the growth underscores the importance of our governors' long-term vision for the airports, and the capital plans that continue to support it.

The airports set 12 records, highlighted below:

Passenger growth in 11 of the 12 months ushered an all-time annual record of 138.8 million passengers — a 4.5 percent gain over 2017.

	JFK	EWR	LGA	SWF	REGION
Domestic	28.1 MILLION	31.9 MILLION	27.9 MILLION	.37 MILLION	88.3 MILLION
International	33.8 MILLION	14.1 MILLION	2.2 MILLION	.32 MILLION	50.5 MILLION
Total	61.9 MILLION	46 MILLION	30.1 MILLION	.69 MILLION	138.8 MILLION

For the third consecutive year, EWR led the region's uptick by adding 2.8 million passengers, for a gain of 6.6 percent. LGA rebounded from last year's construction-related inconveniences to log a 1.8 percent gain and a net addition of half a million passengers. JFK recovered from last year's domestic weakness to register a 3.9 percent improvement, adding 2.3 million passengers. SWF added a net of nearly a quarter of a million passengers as traffic increased a whopping 53 percent, due mainly to the continued strong performance of scheduled international service by Norwegian Air. Regionally, we reached a notable milestone, surpassing 50 million international passengers for the first time in our history—and the first in the nation.

Cargo's recovery was sustained, albeit at a lower rate than 2017, as it grew 2.8 percent compared to 7.6 percent the previous year. Though the growth rate was subdued some, it was nevertheless remarkable because it extended the current streak of growth to five years—one year longer than the next most recent consecutive cargo growth streak (2004-2008).

The attached statistics are a continuing reflection of the Aviation Department's desire to keep our stakeholders informed, and reaffirms our commitment to achieving regional prosperity through a unified system of airport facilities that offer safe and secure environments, excellent customer experience, and environmentally sustainable and friendly services delivered by a first-rate staff.

A handwritten signature in black ink, appearing to read "P. Clark", with a long horizontal flourish extending to the right.

Patty Clark
Chief Strategic Officer
Aviation Department
The Port Authority of NY & NJ

John F. Kennedy International Airport

HISTORY

- Construction for a new international airport began in 1942 under a New York City contract on the site of the Idlewild Golf Course in Queens, New York City.
- The Port Authority of New York and New Jersey began operating the soon-to-open airport on June 1, 1947, under a lease with the City of New York.
- On July 9, 1948, commercial flights began flying into and out of the newly opened New York International Airport.
- The airport was rededicated John F. Kennedy International Airport on December 24, 1963, in memory of the nation's 35th president.
- On February 7, 1964, the Beatles arrived for the first time in the United States and entertained reporters and the public at a press conference in the former International Arrivals Building. Over the decades, the airport has been a gateway for numerous presidents and dignitaries, including thousands who have arrived throughout the years for the annual United Nations General Assembly.
- In 2000, JFK welcomed its one-billionth passenger.
- In 2004, the Port Authority and the City of New York concluded an agreement that ensures the agency's continued operation of JFK through 2050.
- JFK made airport history on March 19, 2007, when the A380, the world's largest passenger aircraft, touched down on U.S. soil for the first time in a route-proving test, and again on August 1, 2008, when an Emirates Airline A380 landed at JFK—the first regularly scheduled arrival of the A380 in the United States.
- In 2018, just five years after JFK surpassed 50 million annual passengers for the first time in its history, it surpassed 60 million.

SIZE AND LOCATION

JFK covers 4,930 acres, including 880 acres in the Central Terminal Area. The airport has more than 30 miles of roadway. It is located on Jamaica Bay in the southeastern section of Queens County, New York City, 15 miles by highway from midtown Manhattan.

AVIATION ROLE

JFK has been recognized for decades as the premier U.S. gateway for passengers and cargo. JFK is the busiest airport in the New York City metropolitan area, and among the busiest in North America and the world. In 2018, the airport handled a record 61.6 million passengers, and more than 1.4 million tons of cargo. The airport handled about 33.5 million international passengers in 2018, also an all-time record and more than any other U.S. airport. About 80 airlines operate at JFK, serving about 170 nonstop destinations.

EMPLOYMENT AND ECONOMIC IMPACT

About 41,000 people are employed at the airport. The airport contributes nearly \$51.3 billion in economic activity to the New York-New Jersey metropolitan region, generating about 279,000 total jobs and more than \$17 billion in annual wages.

INVESTMENT

The City of New York invested about \$150 million in the original construction of the airport. Since then, the Port Authority has invested \$8 billion in JFK.

REDEVELOPMENT

Following New York Governor Andrew Cuomo's "Vision for JFK" announcement in January 2017, the Port Authority began master program and planning efforts to transform JFK into a unified, interconnected, world-class airport capable of accommodating as many as 100 million annual passengers by 2050. Current work includes analysis and conceptual planning for Central Terminal Area roadway re-alignments, including changes to terminal frontage road layouts; assessment of utility demand and capacity issues; coordination with state agencies on airport access issues; and collaboration with terminal developers.

CENTRAL TERMINAL AREA

JFK has six airline terminals surrounded by a dual ring of peripheral taxiways. The original CTA was enlarged from 655 to 880 acres by relocating taxiways to provide needed space for expanding the passenger terminals. There are 131 aircraft gates serving the six terminals. The CTA also includes a cogeneration plant that produces the power supply for JFK, and the heating and air conditioning for the entire CTA.

RECORD TRAFFIC AT-A-GLANCE

TERMINALS

- Terminal 1: The Terminal One Group, a consortium of airlines – Air France, Japan Airlines, Korean Air, and Lufthansa – built the 10-gate international Terminal 1 on the site of the old Eastern Airlines Terminal. It opened in 1998.
- Terminal 2: Delta Air Lines operates Terminal 2 with 10 gates. Delta vacated Terminal 3 when the newly expanded Terminal 4 opened in May 2013. After 50 years of service to JFK, Terminal 3 was demolished. Terminal 3 ramp is now used as an aircraft parking area for 15 planes.

AIRPORT INFRASTRUCTURE

4
RUNWAYS

6
TERMINALS

131
GATES

- Terminal 4: The 1.5-million-square-foot, common-use Terminal 4 opened in May 2001 and contains 36 gates. Terminal 4 includes separate levels for departures and arrivals, consolidated ticketing and baggage operations, improved customer facilities, duty-free retail shops, and a wide variety of eateries. Delta Air Lines redeveloped a portion of the terminal by adding nine new gates, and other enhancements and amenities, which opened in 2013.
- Terminal 5: JetBlue's Terminal 5 opened in 2008. The Port Authority provided nearly \$800 million toward the jointly financed, 29-gate, 635,000-square-foot terminal, which is designed to handle up to 20 million passengers per year. In 2012, JetBlue broke ground on T5i, a 145,000-square-foot expansion to accommodate JetBlue international arrivals. The project was completed at the end of 2014.
- Terminal 7: A \$251 million redevelopment project was completed at British Airways' Terminal 7. The project expanded and reconfigured the terminal for greater efficiency. Improvements included new ticketing and check-in areas, new retail outlets, and a new departure and arrival roadway system. Terminal 7 contains 12 gates.
- Terminal 8: American Airlines' \$1.2 billion transformation of Terminal 8 opened in 2007 and serves domestic and international passengers on three concourses with 34 gates. Terminal 8 includes expanded check-in areas, top name-brand shops and eateries, and numerous services.

ROADWAY ACCESS AND GROUND TRANSPORTATION

A roadway configuration in the Central Terminal Area divides the roadway network into five terminal areas so motorists can make direct connections between terminals, parking lots, and airport expressways. In addition to AirTrain JFK, the airport also is served by taxis, airport coaches, and several car rental agencies.

AIRTRAIN JFK

Opened in 2003, the light-rail system connects JFK with the Long Island Rail Road and New York City subway and bus lines. More than 8.2 million paid passengers used the system in 2018, and about 12.4 million more rode the free portion of the system to connect between terminals, and to parking lots and rental car areas. Recent improvements include digital signage, expanded closed-circuit television, upgraded access control security systems and improved customer communications on-board and in stations.

PARKING

JFK offers more than 15,000 public parking spaces and includes five garages. E-ZPass Plus, which allows customers to use their E-ZPass to pay for parking, is available in all parking lots and garages, except for the overflow lot. Several customer incentives and conveniences were implemented over the past six years. A reservation system was introduced in 2011, and there are seasonal promotions for discounted parking rates at certain parking garages. These promotion rates are advertised on the Port Authority website.

CARGO

JFK is one of the world's leading international air cargo centers. The airport offers nearly 4 million square feet of modern, state-of-the-art cargo warehouse and office space. The entire air cargo area is designated as a Foreign-Trade Zone. JFK serves the world's key air cargo markets through a strong mix of long-haul, direct and nonstop all-cargo aircraft and wide-body passenger aircraft flights.

RUNWAYS/TAXIWAYS

- JFK's runway system consists of two pairs of parallel runways (4L-22R, 4R-22L and 13L-31R, 13R-31L) aligned at right angles. Total runway length is over nine miles.
- Two out of the airport's four runways were constructed in concrete.
- Three out of the airport's four runways are 200 feet wide to accommodate Aircraft Design Group VI aircraft.
- All runways have high-intensity runway edge lighting, centerline and taxiway exit lighting, and are grooved to improve skid resistance and minimize hydroplaning.
- Taxiways total approximately 45 miles in length with widths of 75 feet or 82 feet. There are shoulders and erosion control pavements on each side of the taxiways. Other features include the taxiway centerline light system and a sign system, illuminated at night to provide directional information for taxiing aircraft.
- The Port Authority invested \$200 million for taxiway and airside rehabilitation to prepare for the A380 aircraft, and more than \$150 million was dedicated to fund technical and customer service initiatives to combat airport delays.
- Between 2010 and 2015, the Port Authority invested nearly \$600 million to completely reconstruct the two JFK's departure runways, 13R-31L (Bay Runway) and 4L-22R.

Both runways were reconstructed in concrete and were widened from a 150- to 200-foot width to accommodate operations of Design Group VI Aircraft, increase operational efficiencies, and enhance safety. The runways received new entrances for departing aircraft and new high-speed exits for landing aircraft, which enabled swifter departures and easier access from runways to terminal gates, saving time on the ground for all passengers at JFK.

In 2017, the Port Authority also invested \$106 million to rehabilitate Runway 4R-22L, one of the two arrival runways at JFK. The project provided for rehabilitation of the runway pavement, replacement of electrical infrastructure, and realignment of certain taxiways to allow for faster runway exiting after landing and saving taxing time to terminal gates. Future work on the fourth runway, 13L-31R, and several taxiway rehabilitation projects will continue JFK's efforts to maintain pavement in the best condition and enhance the operational efficiencies of the airport.

AIR TRAFFIC CONTROL TOWER

The 321-foot air traffic control tower opened in 1994 and includes communications, radar, and wind shear alert systems.

HOTEL

The Port Authority completed \$20 million in restoration and preservation measures for JFK's historic TWA Flight Center in advance of an adaptive re-use redevelopment program, which created hotel space and related services in the Central Terminal Area. The 512-room hotel is scheduled to open in May 2019.

INVESTMENT & REDEVELOPMENT

In October 2018, Governor Cuomo announced a \$13 billion investment to transform JFK. The reimagined airport will be anchored by two new world-class international terminal complexes on the airport's north and south sides. The first new gates will go live in 2023 with projected completion in 2025.

Newark Liberty International Airport

HISTORY

- The metropolitan area's first major airport, Newark Airport was built by the City of Newark on 68 acres of marshland. After the airport's opening on October 1, 1928, it quickly became the world's busiest commercial airport.
- During World War II, the airport was operated by the Army Air Corps.
- After the Port Authority assumed responsibility for Newark Airport's operations on March 22, 1948, the agency added an instrument runway, a passenger terminal, a control tower, and an air cargo center.
- The Central Terminal Area was constructed and opened in 1973. Other construction during the early 1970s included the Port Authority Administration Building, the Central Heating and Refrigeration Plant, and taxiways and roadways.
- In 1989, a two-building maintenance complex opened.
- In 1996, the International Arrivals Facility opened in Terminal B, and the automated monorail began operating between terminals and parking lots.
- Terminal C opened in 1988 as the hub of Continental Airlines, and later underwent numerous upgrades.
- In 2001, the monorail was extended to the Northeast Corridor and renamed AirTrain Newark.
- In 2002, the airport was renamed Newark Liberty International Airport to memorialize all those who lost their lives on September 11, 2001. Also in 2002, the Port Authority and the City of Newark agreed to extend the lease through 2065.

RECORD TRAFFIC AT-A-GLANCE

SIZE AND LOCATION

Newark Liberty International Airport (EWR) occupies 2,027 acres, including a 425-acre Central Terminal Area, at roughly sea-level elevation. It is bordered by the New Jersey Turnpike, Interstate 78 and U.S. Routes 1-9 in the cities of Newark and Elizabeth, N.J. and resides in both the counties of Essex and Union and the cities of Newark and Elizabeth.

AVIATION ROLE

EWR is among the busiest North American and international airports. In 2018, EWR served more than 46 million passengers, an all-time record. More than 35 airlines offer nonstop service between EWR more than 160 nonstop destinations.

EMPLOYMENT AND ECONOMIC IMPACT

About 22,000 people are employed at Newark Airport. The airport contributes \$33 billion in annual economic activity to the New York-New Jersey metropolitan region, generating 176,690 total jobs and nearly \$11 billion in annual wages.

INVESTMENT

The City of Newark spent more than \$8.2 million on the construction and development of Newark Airport, and the U.S. government spent more than \$15.1 million prior to 1948. Since assuming the airport's lease in 1948, the Port Authority has invested \$6 billion at the airport.

REDEVELOPMENT

A \$2.7 billion program is under way to replace Terminal A, provide associated roadway and airside improvements, and a new parking garage. The program broke ground in 2017 with construction of three bridges connecting the future Terminal 1, as it will be known, to the roadway system. The new terminal is slated to have a partial opening in 2021 with the full opening in 2022.

CENTRAL TERMINAL AREA (CTA)

The 425-acre oval Central Terminal Area was built as part of a large-scale airport redevelopment program in the 1960s and early 1970s. The CTA consists of three passenger terminals: A, B, and C, and a first-class, ten-story, 585-room hotel with meeting rooms, a pool and fitness center, two restaurants and a bar.

PASSENGER TERMINALS

- Construction of Terminal A began in October 1967, and the facility opened in August 1973. With 28 gates, the terminal branches out into three circular satellite buildings. The satellites contain flight departure lounges, and airline and passenger service facilities. The main terminal building measures approximately 800 by 165 feet, and includes a Welcome Center. A new terminal and related infrastructure will replace the existing terminal in the next few years.
- Terminal B's modernization expanded the two-level facility into three levels. Highlights include inline baggage screening systems and passenger screening systems, a baggage claim hall, departure areas, ticket counters, additional passenger lounges and concessions, and a Welcome Center. Terminal B has 15 international arrivals gates.
- Terminal C opened in 1988. Continental Airlines' Global Gateway project in 2001 added 600,000 square feet of space and turned the facility into a three-level terminal with two levels for departures. The C-3 concourse added 19 gates – bringing the terminal's total to 57 – a huge retail and concessions space, and U.S. Customs facilities. The state-of-the-art International Arrivals Facility, also completed by Continental, added another 1,500-passengers-per-hour arrival capacity to Newark Liberty. A Welcome Center also was added. In 2010, Continental merged with United Airlines.

ROADWAYS

To reduce congestion and improve airport access, roadways were widened and reconfigured in the passenger terminal area and airport entrances, giving vehicles the option to bypass terminals and proceed directly to parking areas.

AIRTRAIN NEWARK

AirTrain Newark, the airport's automated monorail, opened for service on-airport between terminals and parking lots in 1996. The system was extended to a new station on the Northeast Corridor Rail Line in 2001, providing passengers with connections to NJ Transit and Amtrak trains for links between the airport and New York City, Philadelphia, points across New Jersey, and beyond. More than 12 million paid riders used the system in 2018 to connect to the airport at the Northeast Corridor Rail Link station, along with millions of others, who used the system free of charge to travel between passenger terminals, and to connect to parking lots and rental car areas.

PARKING

The airport offers more than 13,100 parking spaces and features a free 100-space Cell Phone Lot. In addition to two short-term surface lots in the CTA (A and B) and a remote long-term parking lot (P6), EWR has two parking garages: P4, a six-level facility at the AirTrain Station that offers optional valet service and ten charging stations for electric vehicles, and the C garage, which is located across from Terminal C. All lots accept E-ZPass Plus, which allows customers to use their E-ZPass to pay for parking, and customers can pre-book parking using the online Parking Reservation System.

INVESTMENT & REDEVELOPMENT

Located in a new site on the Airport property, the new Terminal One eventually will replace the existing Terminal A, the Airport's oldest terminal.

CARGO

The airport is the overnight express package center for the NY/NJ region, offering a full range of short-, medium-, and long-haul services to domestic and international destinations. In 2010, FedEx agreed to continue hub operations at Newark Liberty and committed to a 20-year lease extension. FedEx installed a rooftop solar electric system to provide more than 15 percent of the hub's energy needs. Newark Liberty handled nearly 850,000 tons of cargo in 2018.

AIRPORT INFRASTRUCTURE

3
RUNWAYS

3
TERMINALS

122
GATES

RUNWAYS AND TAXIWAYS

The airport has two parallel runways, 4R-22L and 4L-22R, which support precision instrument approaches at all four ends, and a crosswind runway, 11-29, which supports precision instrument approaches only on Runway 11. Runway 4R-22L is 10,000 feet long, Runway 4L-22R is 11,000 feet long, and Runway 11-29 is 6,726 feet long. All three runways are 150 feet wide. Both of the parallel runways have displaced thresholds to reduce community noise impacts. Visual aids include high-intensity edge lights, LED centerline and touchdown zone lighting, and high-speed exit taxiway centerline lighting. More than 12 miles of 75-foot-wide taxiways link the three runways with the central terminal and cargo areas. A \$42 million rehabilitation of Runway 4R-22L was completed in 2012, and a \$97 million rehabilitation of Runway 4L-22R, including the construction of multi-entrance and cross taxiways was completed in 2014. Runway 4R-22L changed its approach lighting system to an ALSF-2, and additional high-speeds P2 and P3 were completed in 2013. Runway 22L also was upgraded to a Cat III approach system allowing for landings in poor weather conditions in 2013.

PORT AUTHORITY ADMINISTRATION BUILDING

Reconstruction of the airport's original 1935 Central Terminal Building, which is now a National Historic Landmark, was completed in 2002. Now designated Building One, this 100,000 square foot facility now serves as the Port Authority's Administration Building, hosting airport management, operations, program management, the Port Authority Police Command, Aircraft Rescue and Firefighting (ARFF), and an emergency operations center (EOC).

AIR TRAFFIC CONTROL TOWER

A 325-foot air traffic control tower was commissioned in 2003, the fourth in the airport's history. The rooftop of Building One, the Port Authority Administration Building, features what is believed to be the first air traffic control tower ever built. The first air route traffic control center was also established on the airport in 1935.

HISTORY

- At the turn of the 20th century, the airport site, then commonly known as North Beach, was occupied by the Gala Amusement Park.
- In 1929, the 105-acre site was purchased by the Curtiss-Wright Co. and developed into a private flying field. Originally called the Glenn H. Curtiss Airport, it later became known as Curtiss-Wright Field.
- The City of New York purchased Curtiss-Wright Field in 1935 and renamed it North Beach Airport. On September 9, 1937, ground was broken for a new airport, which, on October 15, 1939, was dedicated as New York City Municipal Airport.
- Eighteen days later, on November 2, 1939, the airport was renamed New York Municipal Airport-LaGuardia Field to honor New York City's Mayor, Fiorello LaGuardia.
- On December 2, 1939, the airport opened to commercial traffic. It soon became known simply as LaGuardia Airport.
- The Port Authority of New York and New Jersey began operating LaGuardia Airport in 1947.

SIZE AND LOCATION

LaGuardia Airport covers 680 acres. It borders Flushing and Bowery bays in the northwestern section of Queens County, New York City, about eight miles by highway from midtown Manhattan.

AVIATION ROLE

LaGuardia Airport is one of the nation's leading domestic gateways for business and leisure travel, and is the primary business/short-haul airport for New York City. LaGuardia Airport served 30.1 million passengers in 2018, including a record 2.2 million international travelers. Eleven airlines with 73 nonstop destinations at LaGuardia Airport, which relative to its size, holds the distinction of being the most efficient airport in the world, handling more passengers per acre per year than any other airport.

EMPLOYMENT AND ECONOMIC IMPACT

LaGuardia Airport employs nearly 14,000 people, and plays a critical role in addressing the region's transportation needs, as well as fueling the economy. The airport contributes more than \$18.7 billion in economic activity to the New York-New Jersey metropolitan region, generating almost 113,000 total jobs and nearly \$6.4 billion in annual wages.

INVESTMENT

Original construction by the City of New York cost \$40 million. The Port Authority's total capital investment in the airport to date is nearly \$4 billion.

REDEVELOPMENT

Construction is well under way for the multibillion dollar redevelopment of Terminal B and Terminal C, including related airport infrastructure. A new \$86 million electrical substation provides a more reliable and robust source of power for the airport. Hangars 2 and 4 located just east of Terminal B were demolished in anticipation of redevelopment construction. Additionally, parking lot P2 in front of Terminal B was demolished to make way for the new Terminal B head house. The head house is scheduled to open in 2020. In 2010, the Port Authority completed the airport's Police Crisis Command Center and Aircraft Rescue and Firefighting (ARFF) Facility and the Federal Aviation Administration (FAA) began operating from a new tower. In December 2018, a new Central Heating & Refrigeration Plant (CHRP) located on the east side of the new Terminal B Headhouse opened.

RECORD TRAFFIC AT-A-GLANCE

On December 1, 2018 the East Concourse of the new Terminal B opened. The 250,000 square-foot light-filled new concourse, with 18 gates, is currently occupied by Air Canada, American Airlines (Envoy) and Southwest Airlines. United Airlines and additional American Airlines' flights will use the concourse in the latter half of 2019.

The opening of the East Concourse for Terminal B is part of the \$8 billion transformation of LaGuardia Airport into a unified 21st century terminal system, providing a world-class passenger experience and featuring modern customer amenities, state-of-the-art architecture and more spacious gate areas.

Delta Air Lines is currently building a new Terminal C. The new Terminal C and its four concourses, situated on the east side of the airport, will provide almost 1.2 million square-feet of space for passengers. Designed for speed and efficiency, the new terminal will allow customers to check-in and drop bags at every entrance into the terminal before proceeding directly to the security checkpoint. Dedicated check-in facilities will be available for premium customers while the new Sky Club and outdoor Sky Deck will feature expansive views of the airfield. Within its elegant interior, passengers will have access to larger gate hold rooms with more seating, in-seat power at all seats, as well as increased circulation space for boarding the aircraft and transferring between gates.

PASSENGER TERMINALS

- Originally known as the Overseas Terminal, then the Marine Air Terminal (MAT), Terminal A is the original airport terminal building. It served international flights on flying boats through the 1940s. General aviation also operates from the terminal through a fixed-base operator (FBO). In 1995, the MAT was designated an historic landmark. A \$7 million restoration of the terminal was completed in 2004. On December 9, 2017 JetBlue Airways moved into the Marine Air Terminal.

Dedicated on April 17, 1964, Terminal B currently serves Air Canada, American Airlines, American Shuttle, Southwest Airlines and United Airlines. It is operated by LaGuardia Gateway Partners (LGP), a consortium company of airport experts. The current Terminal B is 1,300 feet long and 180 feet wide, with approximately 835,000 square feet of floor space. Originally constructed at a cost of \$36 million and then expanded and modernized for \$340 million in the 1990s, the terminal consists of a four-story central section, two three-story wings, and the remaining three concourses accommodate 21 aircraft contact gates. The terminal offers two food courts, Welcome Centers in the east and west wings, and MetroCard dispensing machines for those who wish to use New York City public transportation. LaGuardia Gateway Partners is currently building the new Terminal B. The new Terminal B will increase from 835,000 square feet to 1,310,000 square feet and will be designed to accommodate 17.5 million people annually, with 35 aircraft contact gates. The frontage will have three levels as opposed to the current two, and one of the levels will be for HOV's. The new terminal is scheduled for completion in 2021.

Opened in September 1992 and costing \$200 million, Terminal C comprises approximately 300,000 square feet of space with 21 aircraft contact gates. Operated by Delta Air Lines, the terminal features an innovative mix of food, retail, and concessions integrated into the gate holdroom areas and a Welcome Center on the arrivals level. Spirit Airlines (Departures) and Frontier Airways (Departures) are now based in the Terminal.

- In 2017, Delta Air Lines started construction of a new Terminal C that will replace the current Terminal C & D. The purpose of the new Terminal C is to improve aircraft operations & reduce delays to enable airlines to safely & effectively meet passenger demand at acceptable levels of service. The terminal will have improved passenger processing, concessions & retail options & sufficient electrical capacity to provide reliable service. The terminal is scheduled for completion in 2026.

Terminal D, which consists of 10 gates, opened at the east end of the airport in June 1983. It is operated by Delta Air Lines and hosts Delta Air Lines, Frontier Airlines (Arrivals), Spirit Airlines (Arrivals) and WestJet. In 2010, Delta enhanced

INVESTMENT & REDEVELOPMENT

The comprehensive \$8 billion redevelopment of LaGuardia Airport – comprising the construction of an entirely new airport on top of an existing one while keeping it fully operational – is the most significant new airport project in the United States in more than 20 years.

and expanded the terminal's food, retail, and concessions options, and the Port Authority opened a Welcome Center on the arrivals level. Delta expanded its operations into Terminal C following its takeover of the US Airways lease of Terminal C in 2011, and invested nearly \$100 million in its terminal complex to improve customer access, speed baggage handling, and improve the concessions and customer service experience. In 2012, Delta opened a 600-foot-long enclosed walkway connecting Terminals C and D.

PARKING

LaGuardia Airport offers about 3,900 public parking spaces with, E-Z Pass Plus and Express Pay machines in all parking garages. In 2018 a new 3,100-space Terminal B Parking Garage opened for use. The seven-level garage connects directly with Terminal B. Also in the garage is space for FHVs to both stage and pick up passengers from Terminal B. Coincident with the Terminal B Garage opening, LaGuardia Airport launched a first of its kind parking pre-booking website which allows customers to book discounted parking ahead of time, guaranteeing themselves space in the garage.

RUNWAYS

There are two main runways, 4-22 and 13-31. Each is 7,000 feet long by 150 feet wide. In a \$40 million project completed in 1967 by the Port Authority, both runways were extended over the bays around the airport to their present lengths. The runway extensions are supported upon a 50-acre, L-shaped, pile-supported concrete deck structure. All runways have high-intensity runway edge lighting, centerline, and taxiway exit lighting and are grooved for added traction during wet weather. Touchdown zone lighting was added on Runway 13 in 2005 and on Runways 4 and 22 in 2009 as part of the runway rehabilitation programs. As part of an FAA Runway Safety Area project, two new Engineered Materials Arresting Systems (EMAS) beds were installed on Runways 4 and 31 in 2015.

AIR TRAFFIC CONTROL TOWER

The Federal Aviation Administration commissioned a new 233-foot-tall, state-of-the-art air traffic control tower in October 2010. The new tower features the latest aviation technology, including a system that tracks the surface movement of aircraft and vehicles, enhancing safety and efficiency. The \$100 million tower replaced an iconic hourglass-shaped tower that had served the airport since 1964.

New York Stewart International Airport

HISTORY

- In 1930, Archie Stewart, an aviation buff and descendant of prominent local dairy farmer Lachlan Stewart, along with his uncle, Samuel Lachlan Stewart, donated 220 acres of land to the City of Newburgh to be used as an airport.
- In 1934, Douglas MacArthur proposed flight training for cadets, and the City of Newburgh transferred the land to the U.S. government for \$1. Construction begins and a small dirt airstrip was cleared and graded.

RECORD TRAFFIC AT-A-GLANCE

- In 1939, the U.S. Military Academy at West Point built the first airfield at Stewart for cadet aviation training. The north entrance to the USMA was named after the old Stewart farm, "Stoney Lonesome."
- In 1948, the airfield became Stewart Air Force Base.
- In 1970, Stewart Airport was acquired by the State of New York. Operating responsibility was later transferred to the New York State Department of Transportation (DOT).
- In the 1980s, several business enterprises began operations at Stewart after the DOT and Urban Development Corporation began planning for the development of the airport.
- In 1980, Runway 9-27 is expanded to nearly 12,000 feet in length, allowing it to accommodate any large aircraft in the world.
- In 1981, U.S. hostages held in Iran returned to the United States via Stewart Airport.
- In 1990, scheduled air carrier service began as American Airlines offered the first commercial flights.
- On March 31, 2000, Stewart Airport became the nation's first privatized commercial airport under a 99-year lease agreement with National Express.

- On November 1, 2007, the Port Authority purchased the remaining 93 years of the operating lease for \$78.5 million.
- On June 15, 2017, the airport welcomed its first-ever scheduled nonstop transatlantic arrival: a Norwegian Air flight from Edinburgh, Scotland.
- On February 21, 2018, the Port Authority announced the airport was being renamed New York Stewart International Airport as part of an upgrade and modernization program. The new name will make it significantly easier for travelers to identify the airport's geographical location,

SIZE AND LOCATION

Stewart Airport covers 2,400 acres. It is located at the intersection of the New York State Thruway (Interstate 87) and Interstate 84, in Newburgh/New Windsor in Orange County, New York, less than 60 miles north of Manhattan.

AVIATION ROLE

Stewart Airport is an economical, convenient alternative to the New York/New Jersey metropolitan region's airports. Several commercial and charter airlines operate at the airport, offering direct access to a number of major U.S. hubs with connections to virtually anywhere in the world. Stewart handled more than 690,000 passengers and more than 22,000 tons of cargo in 2018.

EMPLOYMENT AND ECONOMIC IMPACT

The airport contributed \$426 million in economic activity to its region, generating 2,390 total jobs and \$142 million in annual wages. More than half the capital projects initiated by the Port Authority have been awarded to local firms and contractors.

INVESTMENT

A \$100 million project that rehabilitated and modernized both runways was completed in mid-2015, representing the largest investment ever made in a single project in Stewart's history. Since the Port Authority took over Stewart Airport in November 2007, it has invested \$186 million to make improvements. Planned investments include continued improvements to infrastructure, safety and security projects, parking, roadways, terminal upgrades, customer service, and amenities.

REDEVELOPMENT

In 1991, Stewart International became the first facility to receive \$5 million in funding under the Federal Aviation Administration's (FAA) Military Airport Program for capital improvements to airports that were formerly military facilities or military/civil aircraft-use facilities. That same year, the FAA awarded Stewart a \$900,000 grant to fund a master plan update, conduct an environmental review, and prepare a noise study. The airport also received \$13 million in federal funding for infrastructure rehabilitation. In 1992, the FAA awarded another \$3 million for terminal expansion and redesign. A 50,000-square-foot air cargo building opened in 1990. In 2007, the Port Authority initiated its redevelopment program, whose upgrades include the complete repaving of both of the airport's runways as part of a \$100 million project — the largest in the airport's history — and a new Federal Inspection Services facility to accommodate international flights. In December 2011, the Port Authority Board of Commissioners approved an expansion of the airport's passenger terminal. Design work is complete on the \$37 million project and construction has begun. The project will be complete in 2020. The Board also approved a solar carport project that will be complete in 2019. The Port Authority built a new \$10 million regional crime lab for the New York State Police as part of an agreement that ensures the police force continues to guard and protect the airport. The lab opened in 2015.

AIRPORT INFRASTRUCTURE

RUNWAYS

1
TERMINAL

6
GATES

PASSENGER TERMINAL

Stewart Airport's terminal features an expansive lobby with 37 check-in stations, several check-in kiosks, shared-use terminal equipment, a checkpoint lane with the latest generation AIT full-body scanner, two Explosive Detection System baggage screening systems, and a new Federal Inspection Service facility to efficiently process international arrivals. The terminal also includes seven passenger gates and jet-boarding bridges, ticket counters, an electronic flight information display system, a spacious baggage claim area, and car rental agency counters. The concourse features top-notch concessions, an ATM, a duty-free shop, a currency exchange kiosk, and wi-fi service.

ROADWAY ACCESS AND GROUND TRANSPORTATION

The MetroNorth-Port Jervis rail line offers a direct link to Secaucus, N.J., from the Salisbury Mills station. The Hudson Line provides a direct link to Grand Central Terminal from the Beacon station. Amtrak service is provided from Poughkeepsie and Croton-Harmon. Some area hotels offer free shuttle service. Black car service is provided by Visconti Ground Transportation. Car rental agencies are located in the passenger terminal. Shortline/Coach USA offers daily round-trip bus service from Stewart Airport to the Port Authority Bus Terminal via the Stewart Airport Express (www.stewartairportexpress.com). The Newburgh-Beacon Shuttle offers weekday service from Stewart Airport to the Metro-North Hudson Line at the Beacon train station.

PARKING

The airport offers approximately 2,000 parking spaces in short- and long-term lots within walking distance of the terminal.

CARGO

Stewart International maintains 536,800 square feet of air cargo facilities and handled more than 22,000 tons of cargo in 2018. The airport handles a variety of cargo, including oversized freight, express packages and livestock. The airport is home to the New York Animal Import Center. Fed Ex and UPS operate regularly scheduled flights at the airport. A USDA inspection facility is located on the airport.

RUNWAYS

Stewart Airport has two runways: Runway 9-27 is 11,817 feet long and Runway 16-34 is 6,004 feet long. Both runways are 150 feet wide, and were completely repaved in 2014.

AIR TRAFFIC CONTROL TOWER

A state-of-the-art control tower was commissioned by the FAA in 2006 and is open 24 hours a day.

INVESTMENT & REDEVELOPMENT

A new, state-of-the-art customs hall will provide for an improved customer experience and a permanent federal inspection service (FIS) facility.

HISTORY

- Teterboro Airport is the oldest operating airport in the New York City metropolitan region.
- Walter C. Teter acquired the property in 1917, and the first flight took place in 1919.
- During World War I, North American Aviation operated a manufacturing plant on the site. After the war, the airport served as a base of operation for Anthony Fokker, the Dutch aircraft designer.
- During World War II, the U.S. Army and U.S. Air Force operated the airport.
- The Port Authority purchased the airport on April 1, 1949, from Fred L. Wehran, a private owner.
- The airport was leased to Pan Am World Airways by the Port Authority in 1970. The airport lease then passed to its successor organization, Johnson Controls, until December 1, 2000, when the Port Authority re-assumed full responsibility for the operation of the airport.

SIZE AND LOCATION

Teterboro Airport covers 827 acres. It borders the municipalities of Teterboro, Hasbrouck Heights, Little Ferry, Moonachie, and Wood-Ridge in Bergen County, N.J., with its northern border on U.S. Highway 46 and its southern border on Moonachie Avenue.

AVIATION ROLE

Teterboro Airport, designated as a reliever airport for general aviation in the New York-New Jersey region, is a 24-hour public-use facility that offers visual, non-precision, and all-weather precision landing capabilities. The airport does not permit scheduled commercial operations, and prohibits aircraft operating with weights in excess of 100,000 pounds.

EMPLOYMENT AND ECONOMIC IMPACT

Teterboro Airport supports more than 5,000 jobs paying \$362 million in annual wages, and generates nearly \$1.2 billion in annual sales activity.

INVESTMENT

The Port Authority has invested nearly \$400 million to upgrade the airport's facilities and open new areas of service to the aviation community.

DEVELOPMENT

Two tenant projects are planned to develop approximately 11 acres of unimproved land at Teterboro that will better meet the needs of newer, more efficient aircraft, thereby improving the operational efficiency of the airport. Additional improvements throughout the airport include the replacement of two older hangars with two new state-of-the-art 40,000-square-foot hangars, a modernized terminal building, and rehabilitated paved parking areas for aircraft.

BUSINESS SERVICES

- Fixed-Based Operations – Teterboro Airport is served by four fixed-based operators that operate passenger terminals and provide a range of services for private, corporate and general aviation aircraft.
- Charter/Aircraft Leasing – Companies can charter an aircraft either to supplement their own aircraft or to travel if they do not own an airplane.

- Cargo – Couriers and small package cargo shippers operate at Teterboro Airport.
- Public Service – Teterboro Airport serves as a receiving point for hearts and other human organs used for life-saving transplant operations performed at medical centers throughout the region.
- International Travel – US Customs & Border Protection (CBP) services are available.

FACILITIES

Twenty-three hangars at the airport have a total area of approximately 572,000 square feet. One large building with an area of approximately 134,400 square feet includes the airport management office. Additional office and shop space at fixed-base operator locations totals about 252,000 square feet. Aircraft rescue and firefighting, operations, and maintenance facilities are located at the airport.

RUNWAYS AND TAXIWAYS

Runway 6-24 (NE/SW) is 6,013 feet long and 150 feet wide, and is equipped with High Intensity Runway Edge Lights (HIRL). Runway 6 approach has an Instrument Landing System (ILS), Medium Intensity Approach Lighting System with Runway Alignment Indicator Lights (MALSR) and Runway End Identifier Lights (REILS). Runway 24 approach is equipped with a Precision Approach Path Indicator (PAPI) and REILS. Runway 6-24 underwent a complete rehabilitation in 2010, during which centerline lights were added to the runway and Touchdown Zone (TDZ) lights were added to Runway 6. Runway 6/24 has an EMAS installed at each end.

Runway 1-19 (North/South) is 7,000 feet long and 150 feet wide, and is equipped with HIRL and REILS. Runway 19 approach has an ILS is equipped with a PAPI and Runway 1 approach is equipped with a Visual Approach Slope Indicator (VASI). Runway 1-19 was repaved and grooved in the summer of 2000, which included the installation of centerline lights and TDZ lights for Runway 19. Runway 1 is the preferred runway for noise abatement procedures. Runway 1-19 was rehabilitated in 2011, and included work to relocate nearby Redneck Avenue to improve the Runway Safety Area with the installation of an EMAS at the runways south end.

The airport features approximately 4.2 miles of taxiways. Most are 60 feet wide and all are equipped with centerline lights and edge lighting systems.

AIRCRAFT MOVEMENTS

2018 – 172,100
2015 – 167,236
2010 – 149,530
2000 – 181,903
1990 – 160,307
1980 – 231,017

AIR TRAFFIC CONTROL TOWER

The control tower, which is open 24 hours a day, was constructed on the east side of the airport by the FAA and went into operation on October 29, 1975. Early action items for the construction of a new tower are progressing.

COMMUNITY RELATIONS AND NOISE ABATEMENT

Since 1987, Teterboro Airport has engaged local communities in dialogue on issues of mutual interest through the Teterboro Airport Noise Abatement Advisory Committee (TANAAC). The airport provides airport data and other information to the Committee as well as facilitates access for TANAAC to the Federal Aviation Administration (FAA) and provides technical advice in support of the Committee's efforts to enhance quality of life for surrounding communities while maintaining the efficiency of airport operations.

Teterboro Airport also has a robust noise abatement program that has been in place since the 1970s. The program is grandfathered from changes in FAA regulations as it predates the Airport Noise and Capacity Act of 1990 (ANCA). The noise abatement program establishes noise limits for operations on its runways that are monitored and tracked. Aircraft that violate the noise limits three times in a two-year period can be banned from the airport. The airport also has a very successful voluntary curfew on nighttime operations from 11 p.m. to 6 a.m.

TERMINAL BUILDING	DOMESTIC		INTERNATIONAL		TOTAL
	INBOUND	OUTBOUND	INBOUND	OUTBOUND	
Airline Terminal	182,956	183,174	156,179	168,102	690,411
Total	182,956	183,174	156,179	168,102	690,411

Note: It is difficult to accurately reflect traffic at passenger terminals with airline tenants whose service to a market group is split between two terminals. This applies primarily to JFK's Delta Terminals 2 & 3 and Terminal 4.

* JFK: Terminal 3 closed May 2013.

† LGA: Delta operates in Terminals A & D and primary in Terminal C.

EWR

Olympia Trails: currently serves Bryant Park and GCT, formerly served lower Manhattan and Penn Station.

Express #300 bus: currently serves PABT.

NJT Rail Services & AirTrain: currently serves Manhattan and various points in New Jersey and operated by Olympic Trails.

Airlink/302 bus: formerly linked Newark Penn Station with EWR but ceased operations with opening of AirTrain.

JFK

New York Airport Service: currently serves GCT and the PABT in Manhattan (formerly known as Carey bus).

AirTrain: currently serves various points in the City of New York and Long Island via LIRR and Subway.

LGA

New York Airport Service: currently serves GCT and the PABT in Manhattan (formerly known as Carey bus).

SWF

Leprechaun Bus: currently serves Beacon Metro-North commuter rail station.

Express Bus: currently serves Port Authority Bus Terminal to SWF

2018	22,362	40,836	13,738	1,405	76,936

Note: n/a = Airport employment survey not available.

* Beginning in 2002, a different method was used to arrive at totals. The earlier period figures were based on surveys of employers at the airports. The current method represents individuals who require airport security badges to work at the airport. There are two types of security badges: SIDA and Sterile.

Security Identification Display Area (SIDA) badges are held by those with access to ramps, runways, taxiways, baggage areas, terminals and airline offices. Sterile Badges are held by those who have access to the passenger terminals, between passenger screening checkpoints and the boarding gates only.

2018

In Millions \$ 2018

Note: Beginning with the 2018 economic impact, the methodology used in calculating the economic impacts was revised to better conform to changes in the aviation industry. This change also includes using the latest IMPLAN Input/Output model. The previous methodology used the Bureau of Economic Analysis Regional Input-Output models (BEA RIMs). As a result, previously estimated economic impacts are not directly comparable.
